PROFESSIONAL SUMMARY

Computer Science graduate with a strong foundation in software engineering, full-stack development, machine learning, and causal AI. Experienced in building full-stack web applications using React, Flask, and MongoDB. Seeking Software Engineering, Full-Stack Development, or AI/ML opportunities to contribute to building scalable, impactful solutions.

PROJECTS

Aivo — AI-Powered Fitness Management System 🔗

React, Flask, MongoDB

- Developed and deployed an AI-powered fitness management platform using React, Flask, and MongoDB, developing RESTful APIs, JWT authentication, workout tracking, and personalized recommendations.

Restaurant Management System 🔗

React, Flask, MongoDB

- Developed a full-stack restaurant management system using React, Flask, and MongoDB, implementing CRUD operations, RESTful APIs, and role-based authentication.

Tree Sterility Detection 🔗

Python, scikit-learn, Pandas

- Developed and evaluated five machine learning classification models using feature engineering, data preprocessing, cross-validation, and model evaluation, achieving over 95% accuracy.

OpenGL Games & Simulation 🔗

Python, OpenGL

- Developed two Python/OpenGL games and contributed to a university team project simulating lunar landing with custom rendering, camera controls, and collision detection.

LANGUAGES

- Bengali (Native)
- English (Fluent)
- Hindi (Conversational)

EDUCATION

B.Sc. in Computer Science

BRAC University | 2026

CGPA: 3.01 / 4.00

Higher Secondary Certificate (HSC)

Cantonment English School and College | 2020

CGPA: 5.00 / 5.00

Secondary School Certificate (SSC)

Bangladesh Elementary School | 2018

CGPA: 4.94 / 5.00

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C

Frontend: React, HTML5, CSS3, Vite

Backend: Flask, Node.js, RESTful APIs, JSON, JWT Authentication, Role-Based Authentication, API Integration

Database: MongoDB, MongoDB Atlas, Supabase

Machine Learning: scikit-learn, Pandas, NumPy, Random Forest, XGBoost, SHAP, Feature Engineering, Model Evaluation, Data Visualization

Causal AI: DoWhy, EconML, CausalML, Difference-in-Differences (DiD), Counterfactual Analysis

Tools: Git, GitHub, Linux, VS Code, Figma, LaTeX

RESEARCH

Undergraduate Thesis — Machine Learning and Causal Inference for Food Price

Forecasting in Bangladesh

- Applied machine learning and causal inference techniques to improve food price forecasting and quantify the causal impact of market shocks in Bangladesh.

AWARDS & CERTIFICATIONS

- Silver Honor**, International Astronomy and Astrophysics Competition
- National Finalist**, Bangladesh Olympiad on Astronomy and Astrophysics
- Cyber Security: Understand Threats and Prevent Attacks (Alison)
- Fundamentals of Digital Marketing (Google)
